Allowable Subject Matter

1. Claims 7-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art a method for checking joining accuracy of a plurality of first pins on a printed circuit board and a plurality of second pins on a package unit, wherein the package unit is coupled to an LCD panel with the second pins thereon corresponding to the first pins, the method comprising the steps of providing a first check pad and a second check pad on the printed circuit board, connecting at least one first pin to the first check pad and at least another first pin to the second check pad and measuring electric resistance between the first and the second pad to get the electric resistance which represents the electric resistance between the first and second pins.

USPAT 6,271,480 discloses an electronic apparatus comprising electronic devices and a printed circuit board wherein the electronic devices have a plurality of lead pins and alignment pins and the printed circuit board has plurality of pads. USPAT 6,266,119 is related to a liquid crystal display apparatus. USPAT 6,211,935 is related to an alignment device for an IC mounted structure. USPAT 5,729,315 discloses a circuit assembly for using in a display apparatus. EP 0268688 is related to an improved method of manufacturing a liquid crystal display devices wherein inspection for checking electrical connections is implemented in advance of the introduction of liquid crystal material between a pair of substrates. However, none of the prior arts alone or in combination teach or suggest the claimed invention.
